Our Commitments

- To Provide STEM Education
- To Remain Accessible to All
- To Create a Community of Like-Minded Thinkers

What is vsHacks?

Vancouver Students' Hackathon is a software engineering competition organized by eleven high school programming clubs across four Greater Vancouver school districts. From June 23 to June 27, teams of up to four students will collaborate to create a piece of software from scratch. We want to create a welcoming space for all students regardless of experience, so we will be providing all the tools for participants to do their best, whether it is mentors, workshops, or activities. We're confident that we can give students the opportunity to learn more about programming and create a fun and memorable experience!

What Makes Us Different?

We are the first ever hackathon hosted by a group of coding clubs in Vancouver *and* made for Vancouver high school students. We are 100% non-profit, and run entirely by student volunteers. We are dedicated to making this event as great as it can possibly be!

Why You Should Sponsor Us

To run this unique competition, we are seeking monetary assistance to purchase prizes as well as to subsidize workshops or software for participants to use. We are also open to other forms of sponsorship, such as hardware, guest speakers or prizes. As we firmly believe that the event should be accessible to all without cost, we would greatly appreciate your help in sponsoring this event.

In return, we offer you the unique chance to reach out to high school students across Greater Vancouver, many of whom are going into STEM fields. Your logo or decal of your choice will be displayed on our advertising material and you can come speak at the opening and closing ceremonies. If desired, we can arrange to host an event to promote your brand, where you can connect with our participants. If you have more specific requests, we are flexible to your needs.

This event will only be possible with your support, and we highly appreciate any assistance you can offer.

Thank You!

Again, we appreciate your consideration in sponsoring this program. With your help, we can truly create a new generation of critical thinkers and problem solvers, who will make a lasting impact on the world. If you are interested, feel free to contact us at contacts@vshacks.tech or check out our website for more information. We hope to hear back from you soon!

Sincerely,
The vsHacks Team
